**"Rejoice, for you are about to die at the hands of the children of Thanos."**

**The Avengers have always been the one thing standing in Thanos's way of conquering Earth. With them off-world facing a cosmic threat, this is the perfect time for the Mad Titan and his collection of the deadliest fighters to take the planet.**

**Earth is not without its defenses. The Fantastic Four, Wakandan military, Inhumans, and great sorcerers still pose major threats. Killing this world wouldn't be any fun without a formidable fight.**
